

Hello,  
How are you doing?  
My name is Shaun from Hong Kong.

I have worked as a proficient web developer on Upwork for over a decade.  
During this time, I've crafted a lot of web applications and saas platforms for clients (mostly in the United States) and got myself promoted as Top rated and qualified developer.

Now I want to enhance my career as Top freelancer on Upwork.

As you know, the hourly rate of American account is much higher than Asia, and I am so confident to use your account with high performance and skills.

I am offering \$200 per month for use of your account on Upwork and will start making more profit than ever before.

More profit, more share with you as I improve your account professional.

For the above, those are things you could do without any doubt;

#### 1) The Account

- If there is an existing account, I will be able to add my skill set and resume.
- If there is not an existing account, I will assist you to create a new one.

#### 2) Use of "TeamViewer"

- Although the account will be under your name, your IP address will be different than mine. Therefore, if I tried to access the account directly from my laptop, the account would be suspended immediately on Upwork.
- Upwork has good sense to detect VPN/VPS so I cannot use either of them to access the account. I will need to access the account remotely.

#### 3) Number of Computers You are Currently Using:

- According to the rules of Upwork: 1 person is allowed 1 PC per account. If you have personal data on your computer and cannot lend it to me, we can install Virtual Machine.
- Once the account is verified, I can use your account with no problem and can soon pay for the new computer for our business.
- I will use our account for about 15 days in order to land my first job.

#### 4) Video Verification via Upwork

- Upwork states that after completing the first gig, you are required to verify yourself via video call.
- The questionnaire is quite simple; your name, phone number, and address.

Note: I would like to send monthly payment directly via Paypal.

For more details, I would like to have a chat via Hangout or discord
